Node-RED interface showing a flow named "Flow 1". The flow starts with an inject node, followed by a debug node, and then a complete node. The flow branches into three parallel paths, each containing a function node (labeled 'f'), which then merge into a single path leading to a msg.payload node. The interface includes a sidebar with node categories (common, function) and a right-hand panel displaying the debug console output.

Debug Console Output:

IBM Watson IoT Platform interface showing the "Browse Devices" page. The page displays a table of devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table shows two devices: "13" (Disconnected) and "abcd\_1" (Connected). The interface includes a sidebar with navigation options (Browse, Action, Device Types, Interfaces) and a top navigation bar with the "Add Device" button.

Table Data:

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
13	Disconnected	abcd	Device	Oct 26, 2022 7:04 PM	
abcd_1	Connected	abcd	Device	Oct 30, 2022 10:33 PM
